

Clearspace

To preserve the integrity of our lockups, ensure that there is always adequate space between it, other elements, and/or boundaries within a page.

Clearspace ensures that headlines, text, and other elements do not encroach on the lockup. As shown in the example, the dimensions of the clearspace are relative to the symbol. Where "X" is equal to the height of the symbol, a clearspace margin of 1/2X should never contain any other design elements.

CLEARSPACE MARGIN EQUAL
TO 1/2 THE HEIGHT OF THE
SYMBOL (X)
